We are looking for a great JavaScript developer who is proficient with React.js. Your primary focus will be on developing user interface components and implementing them following well-known React.js workflows (such as Redux or Flux). You will ensure that these components and the overall application are robust and easy to maintain. You will coordinate with the rest of the team working on different layers of the infrastructure. Therefore, a commitment to collaborative problem solving, sophisticated design, and quality product is important.

YOUR MISSION...

- Developing new user-facing features using React.js
- Building reusable components and front-end libraries for future use
- Translating designs and wireframes into high quality code
- Optimizing components for maximum performance across a vast array of web-capable devices and browsers
- Develop a flexible and well-structured front-end and backend architecture, along with the APIs to support it

SUPERPOWERS YOU'LL NEED...

- Thorough understanding of React.js and its core principles
- Strong proficiency in JavaScript, including DOM manipulation and the JavaScript object model
- Experience with popular React.js workflows (such as Redux or Flux)
- Familiarity with API Creation and RESTful services
- MERN (MongoDB, Express.js, React.js, and Node.js) Stack
- Solid foundation in data structures, algorithms, and system design.
- Skill in React Native is a plus
- Translation of designer mock-ups and wireframes into front-end code
- Database administration and management of a hosting environment

- Unit testing with Jest
- Version control with GitHub

EDUCATIONAL QUALIFICATION...

- There is no binding in educational qualification, we care about skill and will.

OTHER BENEFITS...

- Lunch & snacks with unlimited coffee
- Weekly two days off
- Two festival bonuses
- Performance Bonuses
- Awesome work environment
